Asgard completed the design, supply and installation of this 1,500m² Cleanroom, which included aluminium rapid roller doors, hermetically sealed sliding doors, aluminium honeycomb walk on ceilings and walls. Cleanroom Envelope construction was completed in a very fast twelve week period from commencement to meet clients requirements.

Electrical – Design, supply and installation of recessed stainless steel service panels, automation of sliding and rapid roller doors and their interlocking.

Ceilings – 1,500m² of FM aluminium honeycomb walk-on ceiling panels.

Partitions – 2,000m² of flush metal faced fully flush paneling system 50mm thick.

Doorsets – Provision of approx 30 doors including rapid action doors, hermetically sealed sliders, and various hinged doorsets.

Interlocking – Design, supply, installation and commissioning of interlocking systems.
